

## Servlet Container

```

interface BookDao {
    void addBook(Book b);
}

public class BookDaoJdbcImpl implements BookDao {
    public void addBook(Book b) { ...}
}

public class BookDaoFileImpl implements BookDao {
    public void addBook(Book b) { ...}
}

```

```

public class AppService {
    private BookDao bookDao;

    public void setDao(BookDao dao) {
        this.bookDao = dao;
    }

    public void insert(Book b) {
        this.bookDao.addBook(b);
    }
}

```

beans.xml

```

<bean id="jdbc" class="pkg.BookDaoJdbcImpl" />
<bean id="file" class="pkg.BookDaoFileImpl" />
<bean id="service" class="pkg.AppService" >
    <property name="dao" ref="jdbc" />
</bean>

```

Service. *setDao()*
